Artan Bajqinca
App Developer

I specialize in **cross-platform** and **native app development**

⚛ React Native   iOS   🤖 Android

ABOUT ME

App developer with expertise in React Native, iOS, and Android, specialized in scalable and secure mobile applications. Builds optimized and secure apps using TypeScript, GraphQL, and efficient database systems.

Studying Software Development: Mobile Platforms & Digital Systems at Jönköping University (graduating 2025) and working at Verendus with app and system development, UI/UX, and API security.

With a background in graphic design, I designed and developed two apps, available on App Store and Google Play (see portfolio). Experienced in responsive interfaces.
